<sup>1</sup>Time-to-Degree is reported in elapsed quarters from first enrollment date to graduation. Only the records of students who enter UCSD in the Fall quarter are included in time-to-degree calculations. An academic year is defined as three quarters; twelve quarters equal four years. Summer degrees are combined with Fall degrees and represent one quarter.

Time-to-degree for bachelor degree recipients varies by disciplinary area. In general, engineering majors require more time to complete their undergraduate degree requirements than non-engineering majors.

On average, first-time freshmen take just over four years (13.1 quarters) to graduate. Community college transfer students take just under three years or 8.5 quarters.

<sup>2</sup>For Transfer students, time-to-degree is calculated only for those students who matriculate from a two-year community college (C.C.). The typical community college transfer student enters UCSD with 90 units of transferable academic credit.

Over sixty percent (62%) of the undergraduate degree recipients graduated with a grade point average of 3.0 ('B') or better; one in five graduated with a grade point average of 'B+' or better.
