Institutional Profile and Themes Reports

Table of Contents

Institutional Profile Reports
- How to Read the Institutional Profile Reports — H1
  - a. First-Time, Full-Time Freshmen — 1A
  - b. First-Time, Part-Time Freshmen — 1B
  - c. Not First-Time Freshmen — 1C
  - d. All Respondents — 1D

Enrollment Management Report
- First-Time, Full-Time Freshmen (total, men, women, and genderqueer* by first choice college) — 1
  - * Includes non-binary, genderqueer, gender non-conforming, and identity not listed above.

Institutional Profile Report - condensed version
- First-Time, Full-Time Freshmen (total, men, women, and genderqueer*) — 2
  - * Includes non-binary, genderqueer, gender non-conforming, and identity not listed above.

CIRP Themes Reports
- How to Read the CIRP Freshman Survey Theme Report — H2

The CIRP Themes Report 1
- a. Academic Disengagement — T1
- b. Academic Preparation — T1
- c. College Choice — T1
- d. College Recruitment and Orientation — T1
- e. Diversity — T1
- f. Health and Wellness — T1
- g. Leadership — T1

The CIRP Themes Report 2
- a. Career Planning — T2
- b. Civic Engagement: Participation, Awareness, and Values — T2
- c. COVID-19 — T2
- d. Financing College — T2
- e. Interaction with Teachers — T2
- f. Spirituality/Religiosity — T2
- g. Written and Oral Communication — T2

Appendix
- a. List of Participating Institutions — A1

How to Read the Institutional Profile Report

The Institutional Profile provides comprehensive information on your incoming first-year students as well as data for similar types of schools. Topics covered include the following: secondary school achievement and activities; educational and career plans; parental income and education, ethnicity, and other demographic items; financial aid; and values, attitudes, beliefs, and self-concept. This report provides information that can be used for student assessment activities, accreditation and self-study reports, campus planning, and policy analysis. Separate profile reports are generated for first-time full-time freshmen, first-time part-time freshmen, not first-time freshmen, and all respondents. All comparison group data includes aggregated responses from the 2023 survey.

Comp 1 – The first comparison group is based on your institution's type, control, and selectivity.

Comp 2 – The second comparison group is based on your institution's type and control.

CIRP Construct – If an item is included in the measurement of a construct, the construct name is indicated here.

Mean – The arithmetic mean is computed for each survey item based on the response options. Response options are given numeric values and are listed in descending order (i.e., 4=Essential, 3=Very Important, 2=Somewhat Important, 1=Not Important).

Statistical Significance – Uses a t-test to examine the difference between the mean score for your institution and the comparison group. Items with mean differences that are larger than would be expected by chance are noted with one, two, or three stars, which correspond to the three standard levels of significance (*p< .05, **p< .01, and ***p< .001). Statistical significance measures the extent to which a difference is occurring by chance, not the extent to which a difference is practically important. Large sample sizes (like those in the comparison groups) tend to generate statistical significance even though the magnitude of the difference may be small and not practically significant. In order to provide additional context to statistical significance, effect sizes are provided.

Effect Size – Determines the practical significance of the mean difference between your institution and the comparison group. It is calculated by dividing the mean difference by the standard deviation of the comparison group. Generally, an effect size of .2 is considered small, .5 medium, and .8 large. A positive sign indicates that your institution's mean is greater than the mean of the comparison group; a negative sign indicates your mean is smaller than the mean of the comparison group. Note that a negative effect size is sometimes preferred (e.g. a negative effect size on "How often during the past year did you come late to class" suggests fewer students at your institution reported this was the case).

Standard Deviation – Measures the variability around the mean. A small standard deviation indicates that the responses to the item tend to be very close to the mean, whereas a large standard deviation indicates that the responses are spread over a larger range of response options.

How to Read the CIRP Freshman Survey Themes Report

CIRP Surveys are comprehensive, covering a wide range of topics that research has shown are impacted by the college experience. Theme reports combine relevant items together for easy access. By examining these items together, these reports illustrate what contributes to specific areas of interest on campus and can be used to facilitate discussion on your campus. Although the survey items were included because they relate to the theme, the item(s) may not be the most important to your institution, its mission, programs, or goals. We encourage you to review your entire Institutional Profile for additional results of specific interest on your campus. Theme reports are generated for first-time, full-time freshmen, which we defined as those respondents who first entered college in 2023 and are currently enrolled full-time. The values in the Themes Report come from Tab 1A of the Profile Report.

Diversity - These items relate to social attitudes and experiences with diversity.

Note: Significance * p<.05, ** p<.01, *** p<.001

Theme Description – Provides a brief definition of the topics covered by the theme.

Summarized Frequencies – Full results for all items are provided in the Institutional Profile report.

Mean – The arithmetic mean is computed for each survey item based on the response options. Response options are given numeric values and are listed in descending order (i.e., 5=A Major Strength, 4=Somewhat Strong, 3=Average, 2=Somewhat Weak, 1=A Major Weakness).

Statistical Significance – Uses t-test to examine the difference between the mean score for your institution and the comparison group. Items with mean differences that are larger than would be expected by chance are noted with one, two, or three stars, which correspond to the three standard levels of significance (*p< .05, **p< .01, and ***p< .001). Statistical significance measures the extent to which a difference is occurring by chance, not the extent to which a difference is practically important. Large sample sizes (like those in the comparison groups) tend to generate statistical significance even though the magnitude of the difference may be small and not practically significant. In order to provide additional context to statistical significance, effect sizes are provided.

Effect Size – Determines the practical significance of the mean difference between your institution and the comparison group. It is calculated by dividing the mean difference by the standard deviation of the comparison group. Generally, an effect size of .2 is considered small, .5 medium, and .8 large. A positive sign indicates that your institution's mean is greater than the mean of the comparison group; a negative sign indicates your mean is smaller than the mean of the comparison group. Note that a negative effect size is sometimes preferred (e.g. a negative effect size on "How often during the past year did you come late to class" suggests fewer students at your institution reported this was the case).

Comp 1 – The first comparison group is based on your institution's type, control, and selectivity.

Comp 2 – The second comparison group is based on your institution's type and control.

Standard Deviation – Measures the variability around the mean. A small standard deviation indicates that the responses to the item tend to be very close to the mean, whereas a large standard deviation indicates that the responses are spread over a larger range of response options.

Academic Disengagement - These items relate to the extent to which students engage in behaviors that are inconsistent with academic success.													
Academic Preparation - These items illustrate the academic skills and experiences students bring to college. See also CIRP Construct: Habits of Mind, Academic Self-Concept. See also CIRP Theme: Written and Oral Communication.													
College Choice - These items illustrate the areas students may have considered in choosing to attend college in general, as well as a particular college. See also CIRP Construct: College Reputation Orientation. See also CIRP Theme: Financing College.													
College Recruitment and Orientation - These items relate to campus recruitment and orientation.													
Diversity - These items relate to social attitudes and experiences with diversity. See also CIRP Construct: Civic Engagement, Likelihood of College Involvement, Pluralistic Orientation, Social Agency.													
Health and Wellness - These items gauge student behaviors, attitudes, and experiences related to health and wellness issues.													
Leadership - These items address issues related to leadership, such as leadership opportunities, and how students compare to their peers on leadership-related skills and abilities. See also CIRP Construct: Academic Self-Concept, Social Self-Concept, Likelihood of College Involvement, Social Agency.
