| List of Participating Institutions  | <a href="#">A1</a>  |

---

Note: Columns may be blank if the total has fewer than five respondents. Any column with fewer than five respondents will be suppressed in order to protect confidentiality.

\* Respondents who identify as non-binary, genderqueer/gender non-conforming, identity not listed above, or who chose not to answer the gender identity question are included in the All Respondents tab. These identities are not broken out separately in the reports due to their small cell size (any column with fewer than five cases would be suppressed) for most of the participating institutions.

## How to Read the Institutional Profile Reports

The Institutional Profile provides valuable information on your students' academic and campus life experiences, including post-college plans immediately following graduation. We include this information for students at your institution and two comparison groups. This report provides information that can be used for student assessment activities, accreditation and self-study reports, campus planning, and policy analysis. Separate profile reports are generated for graduating seniors, non-graduating seniors, and all respondents. Graduating seniors are defined as those respondents who indicated that they will have earned a bachelor's degree as of June 2023.

**Comp 1** – The first comparison group is based on your institution's type and control.

**Comp 2** – The second comparison group is based on a similar grouping of institution type and control.

**CIRP Construct** – Items that are included in the measurement of a construct are indicated here.

**Mean** – The arithmetic mean is computed for each survey item based on the response options. Response options are given numeric values and are listed in descending order (i.e., 4=Essential, 3=Very Important, 2=Somewhat Important, 1=Not Important).

| Sample University  | Total     |        |        | Men       |        |        | Women     |        |        | Non-binary, Genderqueer, Gender non-conforming, Identity not listed |        |        | CIRP Construct |

| Effect Size  | -         | -0.32  | -0.23  | -         | -0.25  | -0.15  | -         | -0.25  | -0.15  | -   | -0.35  | -0.27  |                |

**Statistical Significance** – Uses t-test to examine the difference between the mean score for your institution and the comparison group. Items with mean differences that are larger than would be expected by chance are noted with one, two, or three stars, which correspond to the three standard levels of significance (\*p < .05, \*\*p < .01, and \*\*\*p < .001). Statistical significance measures the extent to which a difference is occurring by chance, not the extent to which a difference is important. Large sample sizes (like those in the comparison groups) tend to generate statistical significance even though the magnitude of the difference may be small and not practically significant. In order to provide additional context to statistical significance, effect sizes are provided.

**Effect Size** – Determines the practical significance of the mean difference between your institution and the comparison group. It is calculated by dividing the mean difference by the standard deviation of the comparison group. Generally, an effect size of .2 is considered small, .5 medium, and .8 large. A positive sign indicates that your institution's mean is greater than the mean of the comparison group; a negative sign indicates your mean is smaller than the mean of the comparison group. Note that a negative effect size is sometimes preferred (e.g., a negative effect size on "Since entering college, how often have you felt unsafe on this campus" suggests fewer students at your institution reported this was the case).

**Standard Deviation** – Measures the variability around the mean. A small standard deviation indicates that the responses to the item tend to be very close to the mean, whereas a large standard deviation indicates that the responses are spread over a larger range of response options.

| University of California-San Diego   | Total     |        |        | Men       |        |        | Women     |        |        | Non-binary, Genderqueer, Gender non-conforming, Identity not listed |        |        | CIRP Construct |

\* This variable is recoded (values recoded as 1-6) to exclude "My school is not offering pass/fail grading" and "Not applicable" to calculate the mean.

## How to Read the Longitudinal Profile Reports

The CSS was designed as a follow-up survey to the annual CIRP Freshman Survey (TFS). This report allows you to evaluate the academic and personal development of students over their college experience and to assess the impact of institutional programs, policies, and practices on the students' experiences and outcomes. Longitudinal Reports are based on matched pairs for each survey item, using only students who responded to the survey item on both the CIRP Freshman Survey and the CSS.

**Comp 1** – The first comparison group is based on your institution's type and control.

**Comp 2** – The second comparison group is based on a similar grouping of institution type and control.

**Mean** – The arithmetic mean is computed for each survey item based on the response options. Response options are given numeric values and are listed in descending order (i.e., 3= Frequently, 2=Occasionally, 1=Not at all).

**Standard Deviation** – Measures the variability around the mean. A small standard deviation indicates that the responses to the item tend to be very close to the mean, whereas a large standard deviation indicates that the responses are spread over a larger range of response options.

| Sample University                                    | Your Institution |       |        | Comp Group 1 |       |        | Comp Group 2 |       |        |

| Effect Size  | -                | -0.33 | -      | -            | -0.07 | -      | -            | -0.07 | -      |

**Statistical Significance** – Uses t-test to examine the difference between the mean responses on the CIRP Freshman Survey and the CSS. Items with mean differences that are larger than would be expected by chance are noted with one, two, or three stars, which correspond to the three standard levels of significance (\*p < .05, \*\*p < .01, and \*\*\*p < .001). Statistical significance measures the extent to which a difference is occurring by chance, not the extent to which a difference is practically important. Large sample sizes (like those produced in comparison groups) tend to generate statistical significance even though the magnitude of the difference may be small and not practically significant. In order to provide additional context to statistical significance, effect sizes are provided.

**Effect Size** – Determines the practical significance of the mean difference between responses on the CIRP Freshman Survey and the CSS. It is calculated by dividing the mean difference by the pooled standard deviation. Generally, an effect size of .2 is considered small, .5 medium, and .8 large. A positive sign indicates that the CSS mean is greater than the CIRP Freshman Survey mean; a negative sign indicates the CSS mean is smaller than the CIRP Freshman Survey mean. Note that a negative effect size is sometimes preferred (e.g., a negative effect size on "Since entering college, how often have you felt intimidated by your professors" suggests fewer students at your institution reported this was the case as seniors than as freshman).

CIRP Surveys are comprehensive, covering a wide range of topics that research has shown are important. When examining these items together, these reports illustrate what contributes to specific areas of interest or because they relate to the theme, the item(s) may not be the most important to your institution, its missing results of specific interest on your campus. Theme reports are generated for graduating seniors, defined in 2023.

**Theme Description –**  
 Provides a brief definition of the topics covered by the theme.

**Frequencies –** Full distribution is shown here (same as in 1A).

**Mean –** The arithmetic mean is computed for each survey item based on the response options. Response options are given numeric values and are listed in descending order (i.e., 3=Frequently, 2=Occasionally, 1=Not at all).

**Academic Outcomes** illustrates changes to academic skills and abilities during college and how students' academic skills compare to those of their peers. See also - CIRP Construct: Academic Disengagement, Faculty Interaction: Mentorship, Civic Awareness, Academic Self-Confidence

| Sample University                                    | Graduating Seniors |        |        | Your Inst |
|--|--------------------|--------|--------|-----------|
|  | Your Inst          | Comp 1 | Comp 2 |           |
| <b>Support your opinions with a logical argument</b> |                    |        |        |           |
| Frequently   | 63.7%              | 68.2%  | 75.9%  | 53.1%     |
| Occasionally   | 36.3%              | 29.2%  | 22.2%  | 46.9%     |
| Not at All   | 0.0%               | 2.5%   | 1.9%   | 0.0%      |
| Mean   | 3.82               | 3.76   | 3.92   | 3.87      |
| Standard Deviation                                   | 0.68               | 0.73   | 0.75   | 0.71      |

Note: Significance \* p<.05, \*\* p<.01, \*\*\* p<.001

**Statistical Significance –** Uses the t-test to examine the difference between the mean score for your institution and the comparison group. Items with mean differences that are larger than would be expected by chance are noted with one, two, or three stars, which correspond to the three standard levels of significance (\*p< .05, \*\*p< .01, and \*\*\*p< .001). Statistical significance measures the extent to which a difference is occurring by chance, not the extent to which a difference is important. Large sample sizes (like those in the comparison groups) tend to generate statistical significance even though the magnitude of the difference may be small and not practically significant. In order to provide additional context to statistical significance, effect sizes are provided.

**Effect Size –** Determined for the comparison group. It is calculated based on the difference between the mean of the comparison group and the mean of the comparison group. Note that a negative effect size often have you felt unsatisfied.

## How to Read the CIRP Theme Reports

dicted by the college experience. Theme reports combine relevant items together for easy access. By campus and to facilitate discussion on your campus. Although the survey items were included on, programs, or goals. We encourage you to review your entire Institutional Profile for additional as those respondents who indicated that they will have earned a bachelor's degree as of June

peers to their peers.

Context; CIRP Theme: Active and Collaborative Learning, Academic Enhancement Experiences, Written and Oral Communication.

| Men    |        | Women     |        |        | Non-binary, Genderqueer, Gender non-conforming, Identity not listed |        |        |
|--------|--------|-----------|--------|--------|---|--------|--------|

| 2.2%   | 1.8%   | 0.0%      | 2.7%   | 2.0%   | 0.0%  | 2.7%   | 0.6%   |
| 3.83   | 4.03   | 3.85      | 3.95   | 4.08   | 3.79  | 3.72   | 3.86   |
| 0.75   | 0.77   | 0.71      | 0.76   | 0.78   | 0.66  | 0.72   | 0.73   |
|        | ***    | -         |        | ***    | -   | **     | **     |
| 0.05   | -0.21  | -         | 0.05   | -0.21  | -   | 0.10   | -0.10  |

**Comp 1** – The first comparison group is based on your institution's type and control.

**Comp 2** – The second comparison group is based on a similar grouping of institution type and control.

**Standard Deviation** – Measures the variability around the mean. A small standard deviation indicates that the responses to the item tend to be very close to the mean, whereas a large standard deviation indicates that the responses are spread over a larger range of response options.

effect size is the practical significance of the mean difference between your institution and the comparison group, calculated by dividing the mean difference by the standard deviation of the comparison group. Generally, an effect size of .2 is considered small, .5 medium, and .8 large. A positive sign indicates that your institution's mean is greater than the comparison group; a negative sign indicates your mean is smaller than the mean of the comparison group. A positive effect size is sometimes preferred (e.g., a negative effect size on "Since entering college, how safe on this campus" suggests fewer students at your institution reported this was the case).
